

Thank You For Buying A Heart!

Name: Jacob

Age: 12 Years Old

Heart Condition: Jacob was born with Tetralogy of Fallot (TOF). TOF is a congenital heart defect which is classically understood to involve four anatomical abnormalities . It is the most common cyanotic heart defect, representing 55-70%, and the most common cause of blue baby syndrome. Jacob has had a total of three surgeries with many more to come in his adolescent and adult life. More research could prevent this and bring hope for a new procedure to help Jacob's heart more rapidly.

Fight heart disease and stroke with Jacob, by buying a heart to support the American Heart Association.

HEART WALK.
